

500 ml Wasser von 20°C auf 80°C:

126.000 Ws

Leistung

Energie

Wirkungsgrad

Energie = Leistung • Zeit

100s

2000 W

$$\frac{126.000 \text{ Ws}}{200.000 \text{ Ws}} = 0,63 = 63\%$$

$$\begin{array}{r} 200.000 \text{ Ws} \\ - 126.000 \text{ Ws} \\ \hline = 74.000 \text{ Ws} \end{array}$$
